

32. Створи запит з об'єднанням таблиць студенти та групи, використовуючи join.

The screenshot shows the Microsoft SQL Server Enterprise Manager interface. The central pane displays a SQL query: `SELECT * FROM Groups JOIN Students ON Groups.group_id = Students.student_id`. The left pane shows the database structure, including the 'EducationDB' database and its tables. The right pane shows the 'Свойства' (Properties) window for the current connection. The bottom pane displays the results of the query, which is a table with 10 rows and 8 columns: group_id, group_name, faculty_id, student_id, student_name, surname_name, age, and group_id.
